

SYNTHETIC TURF GOLF GREENS & LAWNS

Unmatched Workmanship
Unequaled Products
Unsurpassed Quality

Since 1999

Nearly two decades dedicated to perfection has earned Precision Greens the right to be called the industry's very best.

Precision Greens' primary focus is Customer Satisfaction. This is achieved by listening to your needs, creating or understanding a Vision and providing an intense dedication to a flawless installation. It is through this process that Precision Greens has earned the trust of thousands of Home Owners throughout British Columbia.

Along the way, Precision Greens has earned the respect of British Columbia's most prominent builders, developers, landscape architects, landscape contractors and other industry professionals that stake their name and reputation on the contractors they choose to employ.

Precision Greens' 10 Year Product Warranty and 3 Year Installation Guarantee ensures our confidence and your piece of mind.

Golf

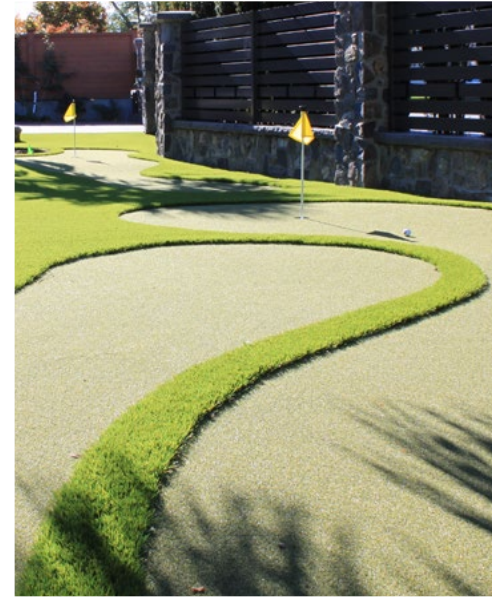

Great game starts at home.

Taking our passion for the game of golf and marrying it with our customer's desire to play at home, we strive to complement your putting green with your home and garden in such a way that it feels and looks like a most natural element.

Tell us your needs, wants and expectations for your golf green, and we will design and construct a feature beyond all expectations.

Bring your short game home.

Premium

The quality and performance of a Precision Greens Golf Green is beyond compare.

Attention to Detail

Our focus on all the elements of construction is what sets us apart. This is not just a business but rather an art and a passion. We realize that an installation is to be treated with mindfulness and concentration and

cannot be rushed. It is with that mentality that your golf green will perform beyond expectations while standing the test of time.

Grass

All of the beauty, none of the chores.

It's time to take back our weekends! Make the change to a flawless synthetic lawn that will last a lifetime and you will join the thousands that have made the switch already. With water tables falling off, and awareness to what harmful herbicides, pesticides and fertilizers

are doing to our environment; the public has fast accepted this new kind of landscaping. It carries many environmental benefits, looks great and is virtually maintenance free...what more could you ask for?

Hard to Grow Areas

A Precision Greens base construction system will solve your drainage problem. The cost of drainage solutions can be high, why not rectify the issue and beautify your home and garden all at the same time? Our grasses are a practical application with areas that do not promote natural growth such as shaded yards, "pet zones" and high traffic areas.

Play

Cleaner, safer play areas.

Precision Greens playground systems make for a great alternative to real grass, offering a premium surface for the myriad of activities to be played on them.

Each type of synthetic turf used by Precision Greens is designed to endure the harshest of environments and provide a safe playing area day after day. Its many

uses range from being installed beneath playground equipment to providing play space at a day-care facility.

Our products are adaptable for all applications and meet the "Certified Fall Rating" when complemented by the Turf Cloud™.

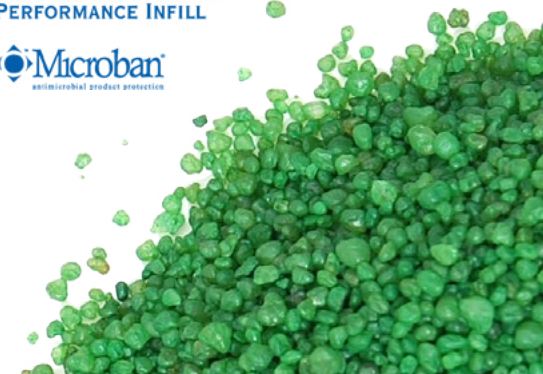

Play spaces that make sense.

The installation of synthetic turf in play areas eliminates the use of pesticides, fertilizers, herbicides and fungicides harmful to children. It requires no mowing, fertilizing, reseeding or watering, making it a sensible choice for high-traffic areas. Our Grasses are gaining popularity in schools and day cares to create colorful, safe outdoor spaces that can be used by the children all year round.

Play hard ... Stay Clean

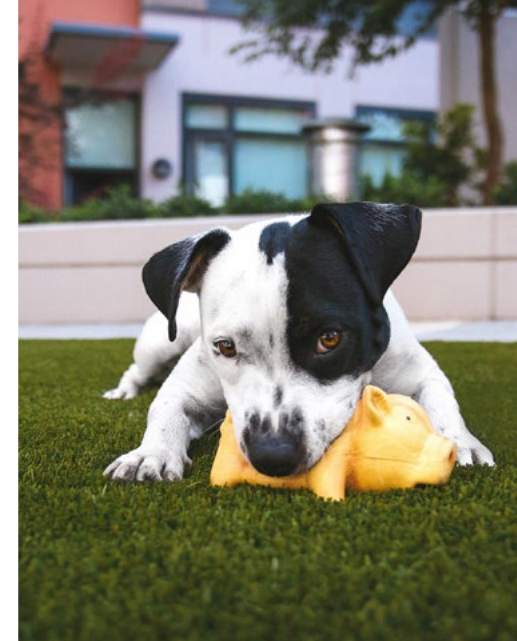

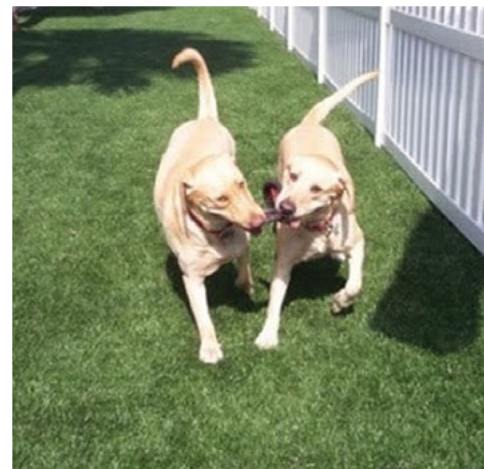

Pets

Cleaner for them, cleaner for you.

With a long list of dog friendly parks, countless miles of beautiful hiking trails and a population full of active people, it's no surprise that the Vancouver area is known for being a dog loving community. Regardless of what you're trying to achieve at home with your pet, we have a synthetic turf system designed to help keep your yard looking great and smelling clean all year round.

With turf in place of natural grass, not only will your yard be cleaner for your pets, but your pets will be cleaner for your house. Mud and debris will no longer be tracked in, regardless of the weather. Our products are resistant to even the toughest dogs, so no more bare or worn patches from hard play. Synthetic turf is uninhabitable for ticks, fleas and other insects so pets are kept safe.

PureZEO for Pets

Pure Zeo is the recommended infill in all pet applications. Made from a natural, organic Zeolite Mineral, this infill breaks down the ammonia in your dog's urine to leave the grass looking, feeling and smelling fresh all year round.

Sports

Sports and Recreation meet Perfection.

The uses for synthetic turf have grown beyond the standard golf green and lawn applications. There are many recreational sports that you can play in your backyard through the right planning and the right surface.

For people who love what they play.

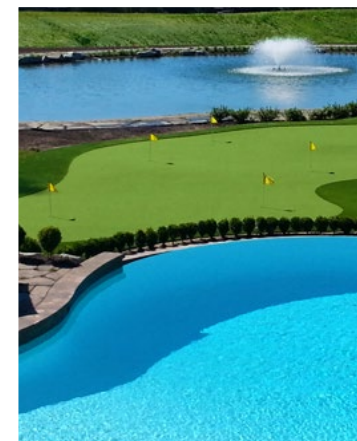

It's your sport, play where you want.

If you and your loved one's have an affinity for sport and possess the desire to play at home, Precision Greens can assist in making that dream come true. If it is a volley ball court, a soccer field or a custom bocce court, Precision Greens can make your home or Strata a sports and rec paradise.

Your imagination is your only limitation.

Thank You

At Precision Greens, we are a family of Professionals that all have an important role to play in maintaining our reputation for excellence while innovating and thriving in a competitive marketplace. Our Team is proud of the work we do and understand that it is YOU that is making our livelihoods possible. In exchange for you putting your trust in Precision Greens we give you the promise of our fullest attention and a commitment to bringing you the best synthetic turf application that our industry has to offer.

You have our full commitment that no one can install your particular application with more precision and care than Precision Greens. Further to this commitment, our follow up service is second to none. In an industry that has seen many companies come and go, Precision Greens has been working for over 17 years to ensure that our clientele continue to enjoy their product long after our crews have left.

Thank you for taking the time and energy to consider us for your project. On behalf of everyone at Precision Greens, we look forward to the possibility of helping you create a feature you enjoy!
