# INFILL THAT'S PET-SAFE

## Because They're Family Too

“ Having a dog and a newborn child, Envirofill was the obvious choice for my family. ”

- Tom Z., Homeowner

Non-toxic and completely reusable, **Envirofill®** makes artificial turf look and feel great. Microban® antimicrobial product protection works continuously to help prevent the growth of bacteria, mold, and mildew that can cause odors and stains.

## Benefits

● **A different kind of infill.** Envirofill is composed of naturally-occurring sand found only in the Hickory Formation of central Texas. Its highly-rounded quartz core resists compression so it doesn't continue to compact over the life of your lawn, promoting better drainage

● **Inhibits pet urine odor.** Microban® technology reduces ammonia odor from urine by 99%. Microban® has been scientifically proven to disrupt the bacteria process that converts pet urine into ammonia odor. So be assured, Fido can go about his business worry-free.

● **It's cleaner.** Microban® antimicrobial protection is infused into Envirofill during the manufacturing process to help prevent the growth of bacteria, mold, and mildew that can cause stains, odors, and product deterioration.

● **It's reusable.** Because of its superior durability, Envirofill's coating and color are warranted for 16 years. When your turf wears out and needs replacement, Envirofill has the potential to be reused in your new turf.

Envirofill's exclusive partnership with Microban® provides an added level of antimicrobial protection for the lifetime of your infill.

# PUTTING MORE GREEN In Your Putting Green

“It looks and feels just like the real thing. It's like putting on a natural green.”

- Rick S., Putting Green Owner

**Envirofill®** keeps your putting greens performing better longer. It's durable, reusable, and with built in Microban® technology, it's resistant to stain-causing bacteria. Because it's non-compacting it will help your putting green perform its best year after year.

## Benefits

**The perfect finishing touch.** Envirofill adds a realistic look to your putting green. The special blend of black and green mimics a natural surface, leaving everyone impressed.

**Consistent speed.** Envirofill's highly rounded quartz core resists compaction so the green's speed stays more consistent over the life of the green.

**Fights against mold and mildew.** Microban® antimicrobial protection is infused into Envirofill during the manufacturing process to help prevent the growth of bacteria, mold, and mildew that can cause stains, odors, and product deterioration.

**Easy installation.** Putting Green turf can be very dense and difficult to infill. With its rounded shape, uniform size and smooth surface, Envirofill quickly settles into the turf saving you time, effort and aggravation.

Envirofill's exclusive partnership with Microban® provides an added level of antimicrobial protection for the lifetime of your infill.

LANDSCAPE

A photograph of children lying on their backs on a lush green lawn. Their feet are propped up in the air, and one child's hands are visible holding a yellow frisbee above their head. The background is a soft-focus green landscape with trees. The right side of the image is decorated with a pattern of orange and yellow circles of varying sizes.

# INFILL THAT WITHSTANDS. A YARD THAT STANDS OUT.

# INFILL THAT STANDS THE TEST OF TIME

## Redefining Your Landscape

“My kids are constantly in and out of the yard, so the anti-microbial infill is helpful in keeping germs at a minimum for all of us.”

- Sarah B., Homeowner

**Envirofill®** makes artificial turf look and feel great. It's tough enough for any application, and it's completely safe. **Envirofill** is American-made using non-toxic components. No wonder it's the favorite of landscape experts for everything from playgrounds and putting greens to residential lawns and pet areas.

## Benefits

- **A different kind of infill.** Envirofill is composed of naturally occurring sand found only in the Hickory Formation of central Texas. Its highly rounded quartz core resists compression so it doesn't compact over the life of the turf.
- **It's cleaner.** Microban® antimicrobial protection is infused into Envirofill during the manufacturing process to help prevent the growth of bacteria, mold, and mildew that can cause stains, odors, and product deterioration.
- **Sustainable.** Because of its superior durability, Envirofill's coating and color are warranted for 16 years. When your turf wears out and needs replacement, Envirofill has the potential to be reused in your new turf.
- **Easy installation.** With its texturized thatch layers, landscape turf can be very dense and difficult to infill. Because of Envirofill's rounded shape, uniform size, and smooth surface, it quickly settles down into the turf—saving you time, effort, and aggravation.

Envirofill's exclusive partnership with Microban® provides an added level of antimicrobial protection for the lifetime of your infill.
